Life is better for Family Physicians in BC's sunny Southern Interior

Here's why...

Whether you are searching for perfect powder, looking to improve your golf game or wanting more time with your family, you can work and enjoy our exceptional four-season recreational playground all in the same day.

We are seeking Family Physicians for several communities in the BC Southern Interior

where you can have a less hurried lifestyle and still enjoy all the amenities of an urban centre.

Visit betterhere.ca to find out more about the opportunities in these communities. Funded recruitment visits and generous relocation allowance provided.

Contact us today and find out why it's better here.

 Interior Health

There's MORE to HPV
than cervical cancer.

GARDASIL®:

The **QUADRIVALENT HPV vaccine.**
Designed to help protect against
infection from HPV types 6, 11, 16
and 18, and the diseases they cause:

- CERVICAL CANCER
- VULVAR CANCER
- VAGINAL CANCER
- GENITAL WARTS IN MALES AND FEMALES
(only those caused by HPV types 6 and 11 in males)

The **ONLY HPV**
vaccine indicated
for **GENITAL**
WARTS in females
and males.*

INDICATIONS AND CLINICAL USE

GARDASIL® is a vaccine indicated in girls and women 9-26 years of age, for the prevention of infection caused by the Human Papillomavirus (HPV) types 6, 11, 16 and 18, and the following diseases associated with these HPV types: cervical, vulvar and vaginal cancers, genital warts, cervical adenocarcinoma *in situ* (AIS), cervical intraepithelial neoplasia (CIN) grades 1, 2 and 3, and vulvar and vaginal intraepithelial neoplasia (VIN/VaIN) grades 2 and 3. GARDASIL® is indicated in boys and men 9-26 years of age for the prevention of infection caused by HPV types 6, 11, 16 and 18, and genital warts caused by HPV types 6 and 11.

SELECTED IMPORTANT SAFETY INFORMATION

The most commonly reported vaccine-related injection-site adverse experiences in clinical trials with GARDASIL® in females (n = 5,088), amorphous aluminum hydroxyphosphate sulfate (AAHS) adjuvant-containing placebo (n = 3,470) and saline placebo (n = 320), respectively, were pain (83.9%, 75.4%, 48.6%), swelling (25.4%, 15.8%, 7.3%), erythema (24.7%, 18.4%, 12.1%), and pruritus (3.2%, 2.8%, 0.6%). The most commonly reported vaccine-related systemic adverse experience in females was fever: 10.3% for GARDASIL® (n = 5,088) vs 8.6% for AAHS adjuvant- and non-AAHS adjuvant-containing placebo (n = 3,790). The most commonly reported vaccine-related injection-site adverse experiences in clinical trials with GARDASIL® in males (n = 3,092), AAHS adjuvant-containing placebo (n = 2,029) and saline placebo (n = 274), respectively, were pain (61.5%, 50.8%, 41.6%), erythema (16.7%, 14.1%, 14.5%) and swelling (13.9%, 9.6%, 8.2%). The most commonly reported vaccine-related systemic adverse experience in males was headache: 7.5% for GARDASIL® (n = 3,092) vs 6.7% for AAHS adjuvant- and non-AAHS adjuvant-containing placebo (n = 2,303).

This vaccine is not intended to be used for treatment of active external genital lesions; cervical, vulvar or vaginal cancers; CIN, VIN, or VaIN. This vaccine will not protect against diseases that are not caused by HPV. Routine monitoring and Pap test should continue to be performed as indicated, regardless of GARDASIL® administration. Pregnancy should be avoided during the vaccination regimen for GARDASIL®. As for any vaccine, vaccination with GARDASIL® may not result in protection in all vaccine recipients. Syncope (fainting) may follow any vaccination, especially in adolescents and young adults. Syncope, sometimes associated with falling, has occurred after vaccination with GARDASIL®. Therefore, vaccinees should be carefully observed for approximately 15 minutes after administration of GARDASIL®.

PLEASE CONSULT THE ENCLOSED PRESCRIBING INFORMATION FOR INDICATIONS, CONTRAINDICATIONS, WARNINGS, PRECAUTIONS AND DOSING GUIDELINES.

*Comparative clinical significance has not been established.

When you talk
to your patients
about

HPV

SELECT GARDASIL® TO HELP PROTECT AGAINST HPV types 6, 11, 16 and 18,
and the diseases they cause:

- CERVICAL CANCER
- VULVAR CANCER
- VAGINAL CANCER
- GENITAL WARTS IN MALES AND FEMALES
(only those caused by HPV types 6 and 11 in males)
