

Society of Rural Physicians of Canada  
27TH ANNUAL RURAL AND REMOTE MEDICINE COURSE  
Halifax Nova Scotia • Halifax Convention Centre  
APRIL 4 - 6, 2019

Dr. Margaret Tromp

SESSION 388

## Choosing Wisely

Choosing Wisely Canada has invited many medical organizations to submit 5 tests or interventions that are medically unnecessary. The SRPC has been invited to develop a Choosing Wisely Rural list. We will discuss interventions that are specific to rural medicine that may meet this criteria. Some initial discussion on the Ruralmed listserv has suggested that interventions related to imaging and medical transport may be appropriate for the list.

1. Become familiar with the criteria used to identify tests and procedures for the Choosing Wisely List.
2. Review the steps involved in producing and disseminating Choosing Wisely guidelines.
3. Have interactive discussion for identify tests and procedures that may be candidates for the list.
