SESSION 389

Diagnosis and Management of Palpitations and Syncope in the Paediatric Population / Children's ECG Findings

This interactive session will focus on common cardiac arrhythmias and structural heart diseases associated with palpitations and syncope in children and adolescents. This session will include audience participation with smartphones via PollEv application.

At the end of the talk the attendees should be able to:

1. Describe common causes of syncope & palpitations in children and adolescents.
2. Recognize red flags & when to refer to specialists.
3. identify abnormal ECG findings associated with life threatening cardiac conditions.
