Maternity Leave Locum coverage wanted
May 2022 – December 2022

Dates very flexible! A July start would also be an option as well
In Walkerton, Ontario
Would also welcome sporadic FP-OB on call coverage

Family practice coverage needed for 2.5-3 days a week of clinic for 900 patients in a rural practice that is very maternal-child focused (FP-OB would be ideal, but any locum would be appreciated!) A nurse does all immunizations, blood pressure checks, etc. The practice is part of a FHO, associated with a Family Health Team and all allied health practitioners are just down the hall within the clinic. The clinic is attached to the hospital (South Bruce Grey Health Centre, Walkerton site), and the Family Birthing Centre is a flight of stairs away. For OB, as a group we do 400+ low risk deliveries per year. My colleagues are very supportive and collegial and will back up as much as needed (+1 is not required). There are no evening or weekend clinics.

Inpatient coverage would be a bonus (currently shared with a colleague 2-3 days per week). Optional opportunities for ER, surgical assisting, or anesthesia coverage if you had other interests. There are long term locums also associated with our clinic for holiday coverage who may be able to cover some clinic time if less is desired.

There are **2 available FHO spots** within our group so this is also a great chance to try things out or just come enjoy cottage country in the summer!
